Routing & Planning

ROUTING EFFICIENCY AT A NEW LEVEL

What if...

Your everyday routing tasks could be done faster than ever?

What if...

Route Analysis could create better insights for your daily plans?

What if...

You had automated tools that found the best school bus routes for you?

Modern pupil transportation departments need modern planning software. With an updated, streamlined user interface, Emirate Transport's SQL software makes your daily tasks easier and faster than ever. Plus, Emirate Transport's optimization capabilities are more accurate than ever before, with an improved proprietary routing algorithm that takes advantage of today's enhanced computing power.

INTEGRATION
AUTOMATION
SIMPLIFICATION

Emirate Transport's Routing and Planning software integrates with your student information system, automatically pulling and populating your transportation rosters, eligibility, and more based on your district's daily records.

What if your school district's routing and planning software required less work, not more?

Let's Be Honest

Transportation departments are being asked to do more with less, which is why Emirate Transport's Routing and Planning software is designed to help you save money, increase safety, and make life easier for you and your staff.

Better, Faster, Stronger

Our intuitive interface lets you work graphically on your customizable maps or with a spreadsheet-style interface to make sure your workflow is comfortable and familiar.

Drag-and-Drop Simplicity

Easily select and assign multiple students to stops, quickly assign stops to runs, and do it all right from your map. Performing your most common routing tasks is easy.

The First Step Towards Savings

Emirate Transport offers a complete suite of student transportation products that make routing easy. Our Routing and Planning integrates with our Cloud-based products, GPS software, Student Ridership, and more.
