FOR IMMEDIATE RELEASE

Education Logistics (EDULOG) Announces that the Collinsville Community Unit School District 10 of Illinois Will Implement an EDULOG Routing and Scheduling System

Missoula, Mont. – December 19, 2011 Education Logistics, Inc. (EDULOG) announced today that it will be implementing a routing and scheduling system (EDULOG.*nt*) for the Collinsville Community Unit School District 10 (CCUSD 10) of Illinois.

The CCUSD 10 is based in the city of Collinsville located in Madison County, Ill., roughly 12 miles from St. Louis, MO. Collinsville is part of the greater St. Louis metro area and the district transports more than 4,000 students.

Products and services that EDULOG will be providing include the EDULOG.*nt* routing and scheduling software, implementation services including mapping, software training, and transportation data entry, and project management by EDULOG staff.

“We’re pleased that the Collinsville Community Unit School District 10 has selected EDULOG to manage its transportation needs, and we know that the district will be successful with our software and continuing support,” stated EDULOG president Jason Corbally. “Implementing a proven and cost-effective routing and scheduling system is certainly one of the best investments that a transportation department can make. Not only does the EDULOG.*nt* system give administrators a complete and accurate account of busing activities, it can also be used to strategically plan for future growth. No other routing and scheduling system has EDULOG’s record of increasing transportation efficiency for both small and large school districts.”

EDULOG.*nt* is a full-featured and easy-to-use transportation management system that can be fully integrated with other EDULOG products such as field trip management, fleet maintenance, GPS/AVL, on-vehicle student tracking, driver time and attendance tracking, and electronic vehicle inspection. At the base level, EDULOG provides an easy-to-use solution for day-to-day management such as assigning new students to a bus or making minor routing changes. As requirements change, the software expands to offer more ways to manage a transportation operation. And when a district needs to make strategic decisions with long-term effects, the EDULOG software guides the district through the complexity. EDULOG solutions are powerful enough to handle “what-if” simulations for opening and closing schools, redistricting, grade reconfiguration, and bell time changes.

Education Logistics, Inc. (EDULOG) has been recognized as the industry leader in pupil transportation solutions since 1978. EDULOG partners with K-12 school districts to provide planning and management systems including true GIS planning and scheduling software, efficiency and optimization studies, guaranteed cost-savings plans, GPS-based routing software, student tracking, driver time and attendance tracking, vehicle inspection, boundary planning, enrollment projection, field trip management, fleet
