FOR IMMEDIATE RELEASE

**Education Logistics (EDULOG) To Provide  
Internet-Based Pupil Transportation System To  
The Union City Community Schools, MI**

**Missoula, MT – June 24, 2009** – Education Logistics, Inc. (EDULOG) announced today that it has contracted with the Union City Community Schools (UCCS) for the purchase of EDULOG's internet-based bus routing and scheduling system, part of EDULOG's suite of transportation management solutions for the K-12 school market. The agreement includes software licenses, related professional services, initial and ongoing consulting, software maintenance, and support. UCCS has invested in EDULOG's *ePTS*<sup>™</sup> (electronic Pupil Transportation System) solution.

UCCS is located in the south-central portion of Michigan's lower peninsula. The School District covers an area of approximately 101 square miles in Branch and Calhoun Counties and includes one elementary school, a middle school, a high school and a community learning center. UCCS had been researching routing software options in recent years and after ultimately decided on EDULOG.

"We selected EDULOG not only for its track record as the industry leader, but it was the only company that was able to commit to ensuring the system would be implemented in time for the 2009 fall school start," said Chris Katz, Director of Technology for UCCS.

"In addition to providing UCCS the routing software and ongoing data services to keep it maintained, EDULOG's ability to also include a run/route optimization study conducted by their experienced consultants was something no other company could match. The fact the system is web-based and platform independent was extremely important to us as a Mac school district," added Katz.

"EDULOG appreciates the opportunity to expand its already sizable list of clients in Michigan, and the growing number of *ePTS* users in the state. The unique depth of the company's experienced consultants allows EDULOG to deliver the desired results for school districts much faster than any other source can provide. We are confident the needs of UCCS will be met and look forward to helping the district increase efficiencies and reduce costs," stated Mike Darling, president of EDULOG.

EDULOG offers the industry's only pupil transportation management solution that combines routing software with in-depth, ongoing consulting and data services. EDULOG's *ePTS* software is widely regarded as the most intuitive and easy-to-use management tool in the industry. With over 150 employees, EDULOG represents the largest pool of industry experience and resources available to directly assist school districts with successfully implementing their routing system. EDULOG's ongoing ASP services place an increased responsibility on the company, rather than the school district, to perform the various tasks required to maintain any brand of routing

software. Clients are assigned a EDULOG Site Manager who personally assists the district by performing the necessary implementation work, facilitates various ongoing work throughout each year for the district, and ensures the school district is able to receive the full value available from automated routing and scheduling.

*Education Logistics, Inc. (EDULOG) is recognized as the industry leader of Pupil Transportation solutions since 1978 with an estimated 150,000+ school buses routed by its clients each day. EDULOG partners with K-12 school districts to provide total transportation management systems including true GIS planning and scheduling software, efficiency and optimization studies, guaranteed cost savings plans, GPS-based routing software, student tracking, driver payroll, vehicle inspection, boundary planning, enrollment projection, field trip management, fleet maintenance, innovative ASP solutions for small districts, and a comprehensive selection of Internet-based products. EDULOG uniquely combines its powerful software with ongoing consulting services from the industry's largest source of such expertise.
