FOR IMMEDIATE RELEASE

**Education Logistics (EDULOG) Announces Another Successful School Start
Using ePTS Software at the
Fonda-Fultonville Central School District, NY**

Missoula, MT – October 15, 2009 Education Logistics, Inc. (EDULOG) announced today that the Fonda-Fultonville Central School District (F-FCSD) of New York has reported another successful school year start for its transportation operation. The F-FCSD implemented EDULOG's ePTS™ (electronic Pupil Transportation System), a hosted software solution, in 2005. The agreement included software licenses, initial and continuing consulting services, unlimited space on EDULOG host servers, and perpetual maintenance and support provided by EDULOG.

"With the EDULOG system, I am able to give the drivers the information they need for their bus runs in a way that is easy to read and easy to use," said Jim Lathers, the F-FCSD transportation director. "As a result, the start of school with regard to transportation went very well—it always does. The people at EDULOG have always been very helpful with whatever I need, and especially with custom reports. I am very thankful that they are just a phone call away."

The Fonda-Fultonville Central School District is located in Fonda, NY and provides education to grades K-12. It includes three schools, with 1,497 students. The Fonda-Fultonville Central School District received the "2008 School Safety Excellence Award," Titanium Level, from the Utica National Insurance Group.

"Ease of use is fundamental to a successful transportation system, and EDULOG provides that with intuitive software, intensive training and support operations, and the industry's only full service ASP solution," explained EDULOG president Mike Darling. "We are always interested in what school districts tell us, and many of the changes that EDULOG has made in both software and operations are a direct result of client requests and suggestions. And the success that our clients have reported validates this commitment to focusing on the customer."

EDULOG offers the only pupil transportation management solution that combines routing and scheduling software with in-depth, continuing consulting and data services and access through the Internet. EDULOG's ePTS system is widely regarded as the most intuitive and easy-to-use management tool in the industry. With more than 150 employees, EDULOG represents the largest pool of industry experience and resources available to directly assist school districts with not only the implementation, but also the operation, of their routing system. EDULOG's continuing ASP services place the responsibility on the company, rather than the school district, to perform the various tasks required to maintain any brand of routing software. Clients are assigned an EDULOG site manager who personally assists the district by performing the necessary implementation tasks, assisting the district with the tasks needed for successful operation throughout each year of the contract, and ensuring that the school district receives full value from automated routing and scheduling.

Education Logistics, Inc. (EDULOG) has been recognized as the industry leader in pupil transportation solutions since 1978, with an estimated 150,000+ school buses routed by its clients each day. EDULOG partners with K-12 school districts to provide total transportation management systems including true GIS planning and scheduling software, efficiency and optimization studies, guaranteed cost savings plans, GPS-based routing software, student tracking, driver payroll, vehicle inspection, boundary planning, enrollment projection, field trip management, fleet maintenance, innovative ASP solutions for small and medium-sized districts, and a comprehensive selection of Internet-based products. EDULOG uniquely combines its powerful software with initial and continuing consulting services provided by the industry's largest source of such expertise.
