February 11, 2010

This letter is regarding the feasibility study Edulog conducted for the Gale-Etrick-Trempealeau School District. The school board was considering several grade configurations changes to the elementary schools in our district. Evaluating the effects on transportation and the cost to the district for each of the scenarios proved to be a complex task. We were pleased with Edulog considering the time and complexity restraints of our requests.

As a school district we were pleased with the extra effort and constant communication with Gina Kortman throughout the process. The results allowed the school board to make grade configurations decisions that would affect both the students and the taxpayers of our district.

Sincerely,

A handwritten signature in cursive script, appearing to read "Terry Collins".

Terry Collins
Director of Support Services
