

April 13, 2011

Amarillo ISD has used the Edulog product starting in May 2004 for district and campus boundary planning. AISD has used the product to assist in boundary planning and documenting boundaries and have been very pleased with the technology. Customer service from the company has been excellent. The Edulog staff is responsive, courteous and most importantly resolved any issues in a timely and accurate manner.

The software has proven to be cost effective in assisting Amarillo ISD with managing district and campus boundaries. We have changed boundaries of individual campuses and the product has been very helpful in the planning process by allowing us to identify students and families impacted by the changes.

A handwritten signature in blue ink that reads "Gary L. Allen".
