Dear EDULOG Team

I found one of the primary benefits of STLC to be the amount of information presented during the round table discussions, where a variety of administrators network and bring insight about their operation. The variety of classes, topics and attendees compare favorably to our local state association meetings, and is enhanced by continuing education on multiple Edulog applications to better manage and manipulate our operation.

One of my biggest concerns everyday is taking students home, so the discussion of student tracking during the technology and transportation class was especially intriguing. The illustration of RFID tracking successfully implemented at a school district helped alleviate some concern and is something my district would definitely like to pursue in the future.

Thank you for this opportunity to participate in STLC.

Sincerely

Earl Tyler
