Missoula, MT 59806

Dear EDULOG:

Memorial Day 2011 will go down in history as one of the most challenging Lincoln Public Schools has ever experienced. For it was on this day a fire swept through and destroyed our entire district office head quarters.

Not only did the fire displace over 200 people it wiped out our mainframe computer systems, including the servers that housed our EDULOG routing software, vehicle maintenance, and associated pupil transportation systems.

For a number of days and weeks we struggled to get our feet back on the ground. Although our computing services department did a wonderful job in achieving restoration of many of our operating systems the sheer magnitude of the recovery was more than they could handle in the short term. Then along came the wonderful people at EDULOG to our rescue!

Much of our back up data was either corrupted and/or not backed up to the degree that we had hoped. As such much, if not all, of the work our staff had completed in the months just prior to the fire was lost. In addition a good portion of our vehicle repair history was also lost and had to be re-entered back in to the system.

Our department could have not met these challenges without the dedication, support, and commitment of EDULOG professionals.

On behalf of our LPS Transportation Department and the entire LPS School District I would like to say THANK YOU to EDULOG for a job WELL DONE.

Sincerely,

Bill McCoy
Director of Operations
Lincoln Public Schools
