December 7, 2009

Dear Edulog Support,

I would like to thank Brenda for that nifty trick of graduating one grade at one school. I wanted to add 5th grade students to an optimization simulation this past school year and was having difficulty getting these future 6th graders into the solution. Brenda created a one grade rollover file and as I watched the process I realized the possibilities in future optimization runs while using this simple procedure.

I would also like to thank Sandy for her help in student data downloads at the time everyone in your support division was extremely busy.

I know I will forget all these cool tricks before the end of this school year but I also know that I now have Edulog Support on speed dial .

Thanks to all for all your assistance.

Sincerely,

Thomas M. Geisler
