Dear Edulog:

I have always been satisfied with Edulog, and the numerous benefits provided by the software. Edulog always meets my expectations, and I would definitely recommend our software to other school districts.

Edulog provides numerous tools and valuable resources that enable me to accomplish a variety of tasks that would otherwise prove very difficult. The Edulog software is very user friendly and easy to use, while offering a level of built in flexibility not available in most other software programs. The wide variety of reports available are worth their weight in gold, and provide great flexibility through the option to generate almost any data contained in Edulog.

Recently, the Manassas City School Board approved an extension to the walk zones for two schools, and using Edulog, I was easily able to extend these walk boundaries, and reduce our costs in the process. Edulog allowed me to change these walk boundaries, reconfigure the routes, and eliminate three buses, in less than one day, saving the district \$63,000 in the process. Completing this project manually, without the assistance of Edulog, would have required three or four times as much time, as opposed to quickly making these changes with Edulog.

The winter of 2010 brought heavy snowstorms to Virginia, during which the snow pack caused the roof of one of our schools to become structurally unsound. Using the Edulog routing software, I was able to optimize the best scenarios to temporarily transport students to their alternate schools, and in less than one week I successfully rerouted 25% of our student population. Once again Edulog saved the day!

I have never encountered anything that Edulog could not handle, and have absolutely no problems with the software. Thank you Edulog, for making my job in transportation easier!

Pamela Youderian
Director of Transportation
Manassas City Public Schools
