

PRINCIPAL SYSTEM ARCHITECT

WHY WORK WITH EDULOG?

EDULOG is a world leader in Student Transportation Systems and we are growing! We have a passion for technology, customer commitment, and innovation. Right now, we are seeking a Principle System Architect to become a key part of our Education Transportation Framework team at our new office in Austin Texas. The ideal candidate is experienced with designing, prototyping and building technology-driven products and should have extensive experience with big data or analytics projects using tools like Hive, Hadoop and Spark. This is an exciting opportunity to enhance your System Architect career while changing the landscape student transportation systems of North America and the Middle East with our cutting edge technology. EDULOG is a dynamic company that fosters a collaborative and creative atmosphere where innovative ideas are encouraged and appreciated.

SUMMARY & OBJECTIVE

This is a strategic technical leadership position responsible for creating a school transportation data model and working with cross functional teams located in the US and Vietnam. The successful candidate will bring not only an abundance of experiences in technologies, but an abundant curiosity to innovate. You're comfortable writing code in Java & .Net and you possess a keen sense for code quality, scalability and performance. You have the experience and perspective to not only design the technical architecture for an individual project, but to also to ensure that interacting projects fit together well in the overall architecture of an enterprise framework. You can act as a mentor for other team members in areas where you are a subject matter expert, and the team will support you with professional growth and learning new technologies.

PRIMARY FUNCTIONS

- Provide technical guidance in product design and development activities.
- Assist in maintenances and upgrades of existing Product Roadmap.
- Lead design reviews and recommend Product improvements.
- Provide support in all phases of Product Development Lifecycle (PDLC) and ensure to deliver high-quality products.
- Provide trainings and mentor other Engineers when required.
- Analyze and troubleshoot Product issues in a timely fashion.
- Develop most effective technical solutions to meet business requirements.
- Assist in risk assessment and mitigation activities.
- Recommend new technologies to ensure quality and productivity.
- Assist in technical audits and make sure to implement audit recommendations.

Smarter Transportation.
