EDULOG Tablet Solutions

EDULOG's tablet solutions are powerful student transportation management tools that allow school districts to access critical information about students, drivers, and school buses in real-time, make data-driven decisions, and maintain open communication at all times.

EDULOG

YOUR COMPLETE ON-BOARD SOLUTION

EDULOG's suite of mobile products turn your buses into mobile transportation systems. Powered by Android software on ruggedized tablets, your drivers will have access to features such as time clock, route sheets, navigation, and student ridership, all integrated with EDULOG's powerful GPS, routing, and driver management platforms.

Powerful Navigation

Complete GPS and Routing Information

EDULOG's suite of tablet products put the power of real-time information in the hands of the drivers.

Available on the Bus:

- Student Ridership
- Driver Time Clock
- Stop-by-Stop Navigation
- Route Substitution
- Driver Directions/Route Sheets
- Messaging

On-Board Driver Access

Time Clock, Student Ridership, and Navigation

The tablet will automatically present the current stop's boarding list and will notify the driver immediately if a student is boarding the wrong bus or getting off at the wrong stop. GPS accurate navigation integrates with your routing software so your drivers can focus on driving the route and not reviewing driver directions. Make you and your drivers' lives easier by bringing timekeeping right to the bus with EDULOG's complete time clock solution that integrates with the eDTA driver management platform.

"I highly recommend this system to any school district that wants to control costs and increase efficiency."

Rodney Shotwell, Superintendent,
Rockingham County Schools, NC
