ROUTING

Optimization and Efficiency

Can optimization make your bus routing more efficient and help alleviate a shortage of drivers?

BELL TIMES

Studies and Optimization

Do you know the financial impact of various proposals to change school starting/ending times?

CONTRACTS

Auditing and Analysis

Have you recently reviewed your contractors' billings to maintain compliance with district requirements and policies?

PLANNING

Demographics and Redistricting

Would unbiased third party analysis help with sensitive political issues such as attendance boundary changes and school closures?

OPERATIONS

Policies and Metrics

Not sure if all of your policies are aligned with what is practiced by the transportation department?

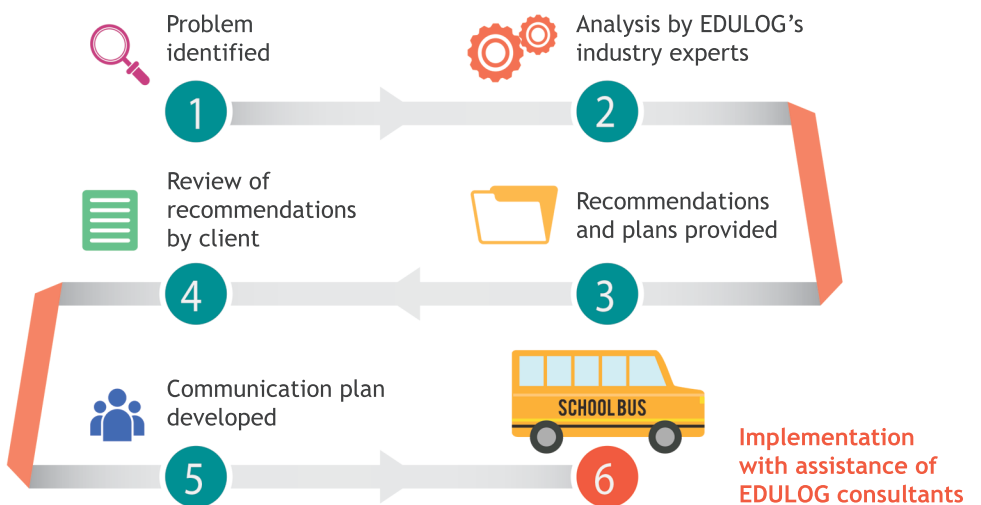

ROUTE DESIGN

Route Management as a Service

No one knows EDULOG software better than we do. Let us design your routes and runs for you.

The EDULOG Method

Education Logistics, Inc. is the original school bus routing software company and has been providing Routing and Planning software solutions to districts across North America since 1977. EDULOG consultants have experience leading state and local school transportation operations and draw on a widely experienced staff to follow your project from inception through implementation. EDULOG's Consulting Services Division understands that staying on budget, or finding new ways to go under it, can make all the difference for your school district. Trust EDULOG to use our over 40 years of experience to look at all the variables, and provide you with solutions that are backed by real data.
