

JAVA DEVELOPER

WHY WORK WITH EDULOG

EDUCATION LOGISTICS (“Edulog”) offers exciting opportunities to enhance your career as part of an industry-leading software company. As an employee at Edulog, you will join teams that improve student transportation systems through our innovative technology, across the U.S. and internationally. You will have the opportunity to gain invaluable experience in the software industry, allowing you to grow professionally and move interdepartmentally as your skills develop. If you are looking for a dynamic company, in which to expand your knowledge and experience professional growth, consider Edulog for a collaborative and creative atmosphere where your efforts are appreciated.

SUMMARY & OBJECTIVE

Edulog is a world leader in Student Transportation Systems and we are growing! We have a passion for technology, customer commitment, and innovation. We are currently seeking software developers to join our team to develop a new product line. The ideal candidate is experienced with developing software engineering programs, delivering within schedule, and delivering above quality expectations. This is an exciting opportunity to join a mission-critical enterprise-wide development project from the ground up.

DUTIES & RESPONSIBILITIES

- Gather functional and non-functional requirements for components by identifying and analyzing dependencies and use cases.
- Produce design documents for components.
- Implement and build back-end components according to approved design documents.
- Write clean, testable, readable, and maintainable backend code that scales and performs.
- Work to improve ease and automation of deployment.
- Support users and other team members by producing detailed documentation.
- Update job knowledge by researching new technologies and software products and identifying new trends in the industry.

SKILLS & QUALIFICATIONS

- Experience writing production-quality Java code; experience with Spring and PostgreSQL strongly preferred.
- Other relevant areas experience are: Hibernate(ORM), REST, JavaScript, JSON, HTML, CSS, Maven, Continuous Integration.
- Ability to complete application development by coordinating requirements, schedules, and activities.
- Ability to troubleshoot development and production problems across multiple environments and operating platforms.
- Excellent technical skills and knowledge, with the ability to work well with others.
- Critical thinking and advanced problem-solving skills.
- Excellent verbal and written communication skill.
- Well-developed organizational and analytical skills.
