Routing Management Features

Routing Management Features

Routes > Bell Time Modal Improvements

Within the Athena 1.71 release, users can streamline work in the Data Management > Routes > Bell Time modal by reducing unnecessary clicks and improving the user experience, ensuring that when users enter the modal, no data is pre-selected, and when the user makes their initial selection, additional selections are made automatically so the user can work with the data more quickly. This update will also allow users to add passengers and complete their most relevant tasks within a single modal more quickly.

Day of the Week Function in Reports

Within this release of Athena, we have added Day of Week is an additional criteria within reports. Users can select the Mon/Tue/Wed/Thu/Fri/Sat/Sun to specify the day of week so that we can restrict the frequency of the run/route for the reports.

Instruction Override

Athena 1.71 now offers a more comprehensive modal for editing directions by allowing users to change run instructions within the Run and Route Modules.

Record Counts in RPO > Routes

Within this release of Athena, users will now be able to see number of records selected when working within the Route Planning Operations > Routes Module.

Read Only Options for User Management

Athena 1.71 now offers role restrictions within User Management that makes the LIVE data environment within Athena "Read Only" access to those chosen individuals. This allows users to look through live data, without being able to change important or sensitive information.
