Routing Management Features

Routing Report Navigation Menu Renamed and Reformatted

Athena 1.72 has an updated Routing Report navigation menu to improve usability. The menu sections have been renamed to better reflect the content of each section and the options beneath these have been reorganized: Reporting has been renamed to Standard Reports, the Edulog Predefined Report section has been removed, the Custom Reports and State Reports sections have been combined into one section named Tenant Reports, and Edulog Advanced Reports has been renamed to User Defined Reports. Additionally, the Alternate Reports Section has been removed and the reports under this section have moved to Standard Reports.

Selected Record Workspace Update

Athena 1.72 displays the most recently selected record in the workspace when a user selects multiple records in the Data Panel. Additionally, a new button “Remove” was added to the selected panel that will unselect all the data selected by checkbox. This same button was added to the details panel to allow unselecting the currently displayed data without having to go through the data panel.
