

EDULLOGGER

Connecting the People Who Move Education Forward

Q2 Issue | July 3, 2026

FROM THE DRIVER'S SEAT: EDITORIAL

The Road is Changing. So Are We.

By *Andréa Brunson*

Student transportation isn't what it used to be, and that's a good thing.

The yellow school bus is still the safest way to get a child to school. But how districts plan, manage, and communicate around that ride has changed dramatically. Parents expect real-time updates. Transportation Directors are being asked to do more with less, faster than ever. The pressure is real, and so is the opportunity.

This is the moment Education Logistics becomes strategic.

Edulog has been building toward this moment for nearly 50 years. Our Athena platform brings routing, GPS tracking, student ridership, driver management, and parent communication together in one place.

But strategy only means something when it shows up for the people doing the work. That's why I'm especially glad to introduce you to Christy Spivey, Edulog's new Chief Customer Officer. Christy joined us in April, and her first move was simple and powerful: she listened. Her article in this issue puts our commitment to you better than I can. I hope you'll read it.

The transformation happening in student transportation isn't coming, it's here. And at Edulog, we're here with it.

Because the road ahead is one we travel together.

THIS ISSUE'S ROAD MAP

Transformation Is the Job

By Christy Spivey, Chief Customer Officer

If you are a transportation director, you already know what transformation feels like. It is not a project on a planning calendar. It is the job.

You've been transforming your operations for years. You have absorbed funding cuts. You have built schedules around a driver pipeline that is smaller and more expensive than it used to be. You have answered to parents who expect to see the bus on their phone, school boards who expect to see the data on a slide, and superintendents who expect all of the above. You have done all of that while keeping the buses running and the children safe. That is transformation, and it is steady and meaningful.

I am new here. I joined Edulog as Chief Customer Officer in April. I have spent my first weeks listening. I sat with our customer success managers, our account managers, our engineers, and a number of you. What I heard, again and again, was that the work you do is hard, the stakes are real, and the partnership you need from Edulog is the kind that shows up before something goes wrong, not after.

That is the transformation we are working on inside Edulog. You should have a CSM who knows your district by name, who sees what is coming before you have to call, and who is accountable for what happens next. You should be planning with us.

You should hear from us in the moments that actually matter to your team, not once or twice a year.

The transformation runs on the product side as well. Routing, telematics, student ridership, and the parent experience should feel like one system to you, not four that you stitch together. The platform should be easier to learn the next time you onboard a router or a dispatcher because the people on your team did not sign up to be software experts.

Some of this transformation you will start to notice as we wrap up this school year and get ready for next year. Some transformations will take longer, and my commitment is to keep you updated on our transformations so you can continue with yours.

If you have something you want me to know, please tell your customer success manager or write to me directly (cspivey@edulog.com). The best work I have done in customer success started with someone who took the time to say what was actually going on. I would be grateful for the same here.

The transformation Edulog owes you is the one that makes your already transformative work a little less heavy. That is what we are building together. I am glad to be doing it with you.

Hello.

It's nice to meet you!

Christy

ROUTING ASSISTANCE PROJECTS

Summer Planning Snafus: What to do?

By Spencer Jenko

As the season of summer begins for districts across North America, transportation departments are once again undergoing a flurry of activity as they work to complete the mountain of tasks that lay before them. And for many, the race to being ready for school startup in the fall is a substantial one.

The list of tasks can seem endless: Students-grade rollovers, processing ride registrations, assigning students to runs, assembling routes, assigning drivers/vendors, balancing transportation needs, etc.... for many it can feel like running a race with endless hurdles to jump over.

And with any race involving hurdles, there is always the possibility of stumbling occurring along the way- whether they happen near the start or on the final stretches. Mistakes occur, delays happen, and sometimes the specter of bad luck shows it head at the worst possible time. And while technology can help transportation departments, its benefits are not without risk.

Edulog offers an “extra helping hand” in this race for school districts with its **Routing Assistance Projects**. This package of services is perfect for transportation departments that are facing a potentially rocky school startup - whether it's a shortage in staffing resources, a new policy going into effect for routes, or simply the strain of limited time.

Routing Assistance Projects act as a dedicated support service for transportation departments, with resources from Edulog that are focused on assisting your routing team through what is arguably its toughest time of the year. Each project brings in a combination of Edulog expertise from its Advisory Service and Customer Success Management groups, who work in-tandem to support, train, and assist your district implement road-ready solutions.

Edulog recognizes that districts occasionally need a helping hand along the way with their transportation department, and its Routing Assistance Projects can be that ‘someone’ to have your back along the way.

If your district has questions about such projects, or would simply like to know more, please contact the Advisory Service Group anytime via our website at <https://www.edulog.com/solutions/advisory/>.

Jasmine Brown

Account Management

Partners in your growth.

Always in Your Corner: Meet Your AM Team

By Jasmine Brown

Transportation departments are asked to do more every year. With growing responsibility, we also see tighter budgets, evolving compliance requirements, growing expectations from families, and technology that keeps changing. Your Edulog account manager is here to make sure you're never navigating that alone.

At Edulog, your account manager is a dedicated partner who knows your district, understands your goals, and is actively working to make sure you're getting real value from your Edulog products and services, today and down the road.

What Your AM Brings to the Table

A dedicated point of contact: One person who knows your account, your history, and your priorities.

Proactive updates: Your AM keeps you informed on what's new, what's changing, and what might be relevant for your team.

Product visibility: Whether you're using one product or several, your AM connects the dots across your Edulog suite — with advisory and professional services available to go deeper whenever your district needs it.

Transportation never stands still and neither does your AM. They stay close to what's changing, and what's coming so every conversation moves you forward.

And it goes both ways. Your feedback, your challenges, your wish list; your AM brings that back to the Edulog team. The relationship is a two-way channel, and we take that seriously.

Your Account Management Team

We've made some updates to our organization and are excited to introduce the Account Management team supporting our district partners going forward:

- **Adam Nelson**, Senior Director of Account Management
- **Andy Liebenguth**, VP of Advisory Services | Strategic Account Manager
- **Jasmine Brown**, Account Manager II

If you're not sure who your account manager is, or if you just want to reconnect and talk through where things stand, reach out—We'd love to hear from you!

THE BULLETIN BOARD: ANNOUNCEMENTS

On the Way: New Training Tools

Big things are coming for client training at Edulog, and we wanted to give you a sneak peek at what's ahead.

We've been hard at work developing new tools and resources designed to make sure you have the knowledge, training, and support you need to successfully use, understand, and get the most out of our products. The focus is simple: we want you to walk away equipped and confident every time.

Here's a look at what we're building for you:

Athena Resource Center — This powerful in-app tool is now built directly into Athena putting Guided Tours, Onboarding and Continued Learning Checklists, Contextual Help, and Release Notes right at your fingertips. No need to leave the application to find answers.

Asynchronous Training — Learning on your schedule is now a reality. We're developing Edulog University self-paced modules, videos, and interactive activities so you can build your Athena skills whenever it works for you.

Hoot MicroLearning — Our Hoot MicroLearning Sessions are continuing, alongside a growing library of training resources designed to support you at every stage of your journey.

We're excited about what's ahead, and we're building all of it with you in mind. Stay tuned for more updates!

Learning together!

Introducing the Athena Resource Center: Your In-App Support Hub

By Madison Irwin

We're excited to announce that a powerful new in-app experience will be launching directly within your Athena site. The Athena Resource Center, is designed to help you learn, navigate, and stay informed on all things Athena— without ever leaving the application.

What Is the Athena Resource Center?

The Athena Resource Center is an integrated support hub that lives right inside Athena. Whether you're a new user getting oriented or an experienced user looking to refine your workflows, the Resource Center puts everything you need within reach.

You'll find it organized into three key areas:

- **Home Tab – Your starting point:** Access onboarding checklists and a client survey to make sure you're set up for success from day one. New users can use the Athena Onboarding checklist to get familiar with Athena navigation, key applications, and terminology, while existing users will find checklists tailored to help them build on what they already know.
- **Product Updates Tab – Stay in the Loop:** Athena Release Notes will now be published directly in the application as soon as they're available, so you're always current on platform changes — no need to go looking for them elsewhere.
- **Athena Contextual Help:** Our Knowledge Base is back and better than ever. Search for articles and technical guides relevant to whatever you're working on, right in the moment you need them.

What Tools are Available to Help me Get Started?

With the launch of the Resource Center comes the rollout of Onboarding and Continued Learning checklists — a structured way to build confidence in Athena at your own pace.

The Onboarding Checklist is your first stop. It introduces the foundational elements of Athena:

core navigation, key applications, and essential terminology, giving you the footing you need before diving into day-to-day work.

From there, continued learning checklists take you deeper. Each checklist focuses on a specific workflow or process within Athena, walking you through it using a mix of articles, technical guides, and guided tours — step-by-step walkthroughs of key tasks so you can learn by doing.

Whether you're brand new to Athena or looking to sharpen your skills, the checklists meet you where you are and guide you forward.

What's Coming Next

The Athena Resource Center is just the beginning. Here's what's coming after the initial rollout:

- **New adoption checklists approximately every two weeks**, helping you continue building skills and exploring Athena's capabilities over time.
- **Ongoing Knowledge Base articles** covering new workflows, feature updates tied to the Athena upgrade schedule, and any content gaps identified along the way.

In the meantime, if you have questions about the Athena Resource Center or want to learn more about what's coming, feel free to reach out to Customer Success Manager (CSM) or the Edulog Enablement Team about what's coming.

User Groups: Back This Fall!

By Chuad Johnson

After the summer break, the Edulog User Group series will be returning and we're kicking off the new school year with three sessions packed with practical tips, real-world insights, and plenty of time for your questions.

Here's what's on the calendar:

September | Contextual Help

Hosted by Madison Irwin

Discover how to use our built-in help tools to find answers on your own terms right when and where you need them.

During the Resource Center User Group session, you'll get hands-on experience with the following:

- Launching checklists and guided tours aligned to your training goals directly within our platform.
- Searching for relevant articles and following along with process steps in real time as you work.
- Submitting feedback to request new content and help shape what's built next.

October | Case Study: Implementing Efficiency Changes

Hosted by Spencer Jenko

Spencer Jenko shares how districts have successfully put efficiency improvements into action. Bring your questions because this one is full of takeaways.

November | Field Trip

Hosted by Basia Kobylenski

An exploration of Field Trip features you may not have had a chance to dig into yet. Come curious!

User Groups are one of the best ways to connect with Edulog product experts, hear how other districts are solving similar challenges, and make sure you're getting the most out of your software.

We look forward to seeing you this fall!

COMING DOWN THE ROAD: UPCOMING EVENTS

Welcome to Edulog!

We are thrilled to welcome the following new team members.

Perry Turbes
Interim CEO

Perry Turbes has spent more than 25 years building software companies that earn the long-term trust of their customers. As a multi-time CEO and experienced board member, he has consistently grown businesses by investing in product, developing high-performing teams, and putting customer outcomes at the center of every decision.

Perry's career began at Quorum Software, where he spent nearly two decades progressing from early product and sales roles to Chief Commercial Officer, President & COO, and ultimately CEO. That progression gave him a hands-on understanding of what it takes to build software customers rely on—and what it means to transform a platform from the inside out. The result was a stronger product, deeper customer relationships, and a company that fundamentally raised the bar for its industry.

Perry later led HungerRush, a point-of-sale, digital ordering, and payments platform serving multi-unit restaurant operators. Most recently, he served as Interim CEO of Procurement Partners, a leading spend management and procure-to-pay platform helping healthcare organizations streamline purchasing and focus on patient care. He also serves on the boards of Procurement Partners and IsoMetrix, enterprise software companies spanning healthcare and risk management.

He holds a B.S.B.A. in Accounting from the University of Northern Colorado.

At Edulog, Perry is focused on what he has always believed matters most: building software that works, supporting the people who use it, and earning the trust of the school districts that rely on Edulog to help keep students safe every day.

One platform for everything your district needs.

Welcome to Edulog!

Christy Spivey
Chief Customer Officer

Christy came to EdTech by way of the classroom; she has a Master's degree in English and years of experience as a high school English teacher.

Over the past two decades, Christy has built a distinguished career in the EdTech industry, leading across nearly every area of the business — from product and curriculum development to operations, professional services, and customer success.

Throughout her career, Christy has earned a reputation for building teams that are productive, adaptable, and aligned around clear goals. She has guided organizations through periods of significant growth and change while maintaining an unwavering commitment to the success of customers and colleagues alike. She leads with clarity, high standards, and a genuine investment in the people and districts she serves.

At Edulog, Christy is focused on ensuring every customer has what they need to get the most out of their investment — building out the customer journey, strengthening relationships, implementing customer health metrics, driving outcomes, and helping districts keep students moving safely and efficiently.

Gordon Duff
Sales Solutions Architect • New Logo

Gordon brings over 15 years of experience in K-12 education technology and a genuine passion for helping school districts thrive. Throughout his career, Gordon has partnered with districts across North America — working alongside leaders to identify solutions that support students, staff, and operations from the ground up. He comes to Edulog with a strong track record of building lasting district relationships and a deep understanding of what it takes to drive long-term success.

Outside of work, Gordon is a devoted family man who loves cooking, fishing, and getting outdoors. He also has a unique hobby: breeding tropical fish. But his greatest title? Proud cheer dad to his 6-year-old daughter, Isla.

Gordon is eager to hit the ground running and looks forward to helping districts strengthen their transportation operations, safety, and communication. Please join us in giving him a warm Edulog welcome — we're so glad he's here!

Edulog's New Leadership
Click here to learn more.

Welcome to Edulog!

Kolten LaMiaux

Accounting Manager • Finance

We're excited to welcome Kolten to the Edulog Finance team, where he joins us as an Accountant! A licensed CPA, Kolten holds a Master of Accountancy from the University of Montana (2018) and brings a well-rounded background spanning both public accounting and private industry — including experience at another PE-backed software company right here in Missoula. He'll be a regular face in the office, and we're glad for it.

Beyond his day-to-day work, Kolten is an active contributor to the Missoula community. He currently serves on UM's Accounting and Finance Advisory Board and is a founding board member of Making Missoula, a nonprofit dedicated to supporting artists and makers throughout the greater Missoula area with educational and financial resources.

Outside of work, Kolten enjoys life in Missoula with his wife and their Chiweenie, and can usually be found running, hiking, or fishing. And here's a fun fact worth knowing: before his accounting days, Kolten spent time as a fly fishing guide on the Big Hole River near Butte — a chapter he fondly refers to as his "trout bum era."

Please give Kolten a warm welcome — we're thrilled to have him on the team!

Mark Nygren

Product Manager • Engineering

We're excited to welcome Mark to the Edulog Products team as a Product Manager. Mark joins us remotely and brings a strong background in ed-tech product leadership — most recently from SuperSummary and Trilogy, where he led AI content systems and product strategy for educational apps.

What makes Mark's path especially fitting: before moving into tech, he was a history teacher in Missoula. That classroom experience gives him a grounded perspective on what educational products need to actually work for the people using them.

Outside of work, Mark enjoys time with his family, running, and music. He's also bravely taken on the role of youth soccer coach for his kids' YMCA team — a season he might describe as more character-building than trophy-chasing. There's always next year!

Please join us in welcoming Mark to the team — we're glad to have his experience and perspective on board!

Welcome to Edulog!

Alex Kenney

Technical Support Specialist Intern - CS Team

Alex Kenney was born and raised in Billings, MT and has lived in Missoula for nearly three years. He is heading into his senior year as a double major in Cybersecurity and Psychology at UM. Alex also serves as the lead instructor for the table tennis and billiards classes at the UM Gaming Den. In his free time, he loves to cook, listen to and make music, hang out with friends, and ride his bike around town.

Jack Colton

Technical Support Specialist Intern - CS Team

Jack Colton was born and raised in Polson, MT. After graduating high school, Jack moved to Bozeman to study Computer Science. Following his sophomore year, he transferred to UM, relocated to Missoula, and switched his major to MIS for more practical career opportunities. Outside of school, Jack enjoys lifting, skiing, and traveling — though he has no plans to ever leave Montana.

Will Mishler

Technical Support Specialist Intern - CS Team

Will Mishler is from Fort Shaw, MT and moved to Missoula for college. He is pursuing his bachelor's degree in MIS/Accounting from the UM Business School and is currently enrolled in the summer session. He enjoys hiking, fishing, and working out.

Quinn Olney

Technical Support Specialist Intern - CS Team

Quinn is joining as an Intern after spending a semester studying abroad at the University of Sheffield in England. Quinn is originally from Helena, Montana, pursuing a Computer Science degree with a focus in Software Engineering at the University of Montana. Outside of school, he enjoys music production, biking, programming, and spending time outdoors.

Welcome to Edulog!

Nikolai Figaro

IT Technician • Information Technology

Nikolai Figaro was born in Florida and spent 13 years in North Dakota before his family settled in Polson, MT during his sophomore year of high school. He is currently finishing his degree at the University of Montana, where his academic path took a few interesting turns — he started in Computer Science, explored MIS, and ultimately committed to Cybersecurity. The decision wasn't easy, but the field's versatility won him over. It keeps him close to the computers he loves while opening doors across a wide range of career paths.

Outside of school, Nikolai stays active through workouts and snowboarding, and unwinds with video games, TV, and time with his girlfriend. He has a passion for travel and is eager to get back to Europe after a memorable trip there a few summers ago. Nikolai is joining Edulog as an IT Technician.

Employee Spotlight

Bret Marquardt

IT Team Lead • Information Technology

This quarter, we are proud to shine the spotlight on Bret Marquardt — the steady hand behind Edulog's IT operations and a quiet force keeping our daily work humming.

Bret leads the day-to-day activities of the IT team, making sure all of Edulog's systems are running optimally while supporting users around the country and across the globe. It's a job with a wide footprint — PCs, networking, enterprise applications, AI, and every other piece of the modern IT puzzle. Bret is constantly thinking on his feet and switching gears to tackle the latest challenge, most of which happens quietly behind the scenes.

On any given day, that might mean troubleshooting a network hiccup in one office, rolling out updates to a fleet of laptops, evaluating a new platform, coordinating with vendors on enterprise systems, or thinking through how the latest wave of AI tools should fit into the way Edulog works. The variety is the job — and Bret handles it with a level of composure that's easy to take for granted until you stop and consider just how many balls are in the air at once.

What stands out just as much as the technical breadth is the way Bret shows up for people. Whether it's a colleague stuck on a login issue first thing in the morning, a new hire getting set up, or a teammate working through a complex project, Bret meets them where they are and always with a path forward.

Bret has been part of the Edulog family since January 2017, and over those years his efficient problem-solving, broad expertise, and willingness to dive into whatever needs attention have made him a trusted go-to across the company.

Thank you, Bret, for everything you do to keep Edulog moving.

See below for some fun facts about our friend and teammate, Bret:

Favorite Color: Blue

Dream Vacation: Chilling on a warm beach with my husband

Favorite Quote: "Toto, I've got a feeling we're not in Kansas anymore." *Dorothy* and "If I only had a brain." *Scarecrow*

Favorite professional sports team, or musical artist, or book:

- Sports: Some say I like the Seattle Seahawks... I don't see it
- Musical Artist: Classical: Mozart Modern: Alan Walker
- Book: Terry Brooks *Sword of Shannara*

What is something unique about you (a fun fact) that few people are aware of: My best friend and I connected the first Storage Area Network (SAN) to a Microsoft Windows Server.

What do you enjoy doing in your spare time: Spare Time? What is this foreign concept?

Continued on the next page

CREW SPOTLIGHT: EMPLOYEE UPDATES

Favorite place to eat in Missoula: Thai: Koh Chang, Chinese: China Garden, Mexican: Fiesta En Jalisco

Where are you from/where did you grow up:
Born in a sovereign nation (Ronan, MT) Grow up?
What is this foreign concept of grow up??
(Missoula, MT)

If you could live anywhere in the world, where would it be? San Diego, CA/Hawaii

If you could compete in the Olympics, which sport would you choose? Diving

Can you play any instruments? If so, which one(s)? I have developed the fine art of buying and playing CDs and MP3s

What are two things on your bucket list:
Before I can put my list in my bucket, I have to find where I set it down...

1. Take the train through the Grand Canyon
2. Week in Hawaii

Do you have any pets, if so what type/name:
1 cat/Sami is the queen of the house's name

If you could pick up a new skill in an instant, what would it be: I would become a communication expert/writer.... I wish I could write things the same way that they are in my mind.

Favorite Edulog Product or favorite part of working at Edulog: The best part of working at Edulog is the people as everyone brings a unique perspective.

Edulog advice (to clients or co-workers):
Everyone makes a difference at Edulog. If you are a customer, your input is invaluable to our product line. If you are a co-worker, your input into all aspects of the business is taken and seriously considered. I have watched this company migrate from a pretty good place to work for employees to a darn good place. Communication from the top has made a difference.

Thanks for all you do
at Edulog, Bret!

We appreciate you!

THANKS FOR MAKING EVERY YEAR COUNT!

Kenyan Beef Stew - by Joan Muse

Spicy

4 Servings

60 minutes

A rich, warmly spiced East African stew slow-simmered with tomatoes, onions, and hearty potatoes - comfort food at its finest.

INGREDIENTS

- 1.5 pounds beef chuck or stew meat, cut into 1.5-inch cubes
- 1 pound Yukon Gold potatoes, peeled and quartered
- 1 large onion, finely diced
- 3 large tomatoes, chopped
- 4 garlic cloves, minced
- 1 tablespoons fresh ginger, grated
- 2 tablespoons tomato paste
- 2 cups beef stock
- 3 tablespoons vegetable oil
- 1 teaspoons ground cumin
- 1 teaspoons ground coriander
- 0.5 teaspoons turmeric
- 1 teaspoons paprika
- 0.3 teaspoons cayenne pepper
- 1.5 teaspoons salt
- 0.5 teaspoons black pepper
- 3 tablespoons fresh cilantro, chopped (to garnish)

Instructions continued on the next page.

NOTE FROM THE CHEF

This is a classic Kenyan **mchuzi wa nyama** - a deeply savory, tomato-based stew with warm spices like cumin, coriander, and turmeric that are characteristic of East African cooking. The recipe scales up or down using the *serving adjuster**.

Testimony:

Selma a student from Egypt says, "I look forward to the beef stew every time when we have the Whitworth University's international students' dinners. It's one of the dishes that's loved by many and it disappears within no time. I love pairing it with jasmine rice."

INSTRUCTIONS

1. **Sear the beef:** Season the beef chuck or stew meat, cut into 1.5-inch cubes with 1.5 teaspoons salt and 0.5 teaspoons black pepper. Heat 3 tablespoons vegetable oil in a large pot over high heat and sear beef until deeply browned on all sides. Remove and set aside.
2. **Cook aromatics and spices:** In the same pot over medium heat, sauté 1 large onion, finely diced until golden, about 6 minutes. Add 4 garlic cloves, minced and 1 tablespoons fresh ginger, grated, cook 2 minutes. Stir in 1 teaspoons ground cumin, 1 teaspoons ground coriander, 0.5 teaspoons turmeric, 1 teaspoons paprika, and 0.3 teaspoons cayenne pepper for 1 minute, then add 2 tablespoons tomato paste and cook 1 more minute.
3. **Build the sauce:** Add 3 large tomatoes, chopped and simmer for 8–9 minutes, stirring occasionally, until broken down into a thick sauce.
4. **Simmer the beef:** Return beef to the pot, pour in 16 oz beef stock, bring to a boil, then reduce heat to low. Cover and simmer for 45 minutes.
5. **Add potatoes and finish:** Add 500 grams Yukon Gold potatoes, cover, and simmer for 20 mins until potatoes are tender and beef is fall-apart soft.
6. **Adjust and serve:** Taste and adjust seasoning. Garnish with fresh cilantro, and serve with rice.

Homemade Caramel Frappe

By Paulina Rios

INGREDIENTS

2 cups crushed ice
1 cup brewed coffee
1 cup milk
2 tablespoons caramel syrup/sauce
Whipped cream (optional)

INSTRUCTIONS

Blend ingredients in a blender on high for 1-2 minutes.

Pour into a cup and then add whipped cream on top and drizzle with additional caramel sauce if desired.

Serving Adjuster - There are several highly rated apps that let you type in, paste, or clip your own recipes and automatically scale the ingredient portions up or down.

Check out:

- **Recipe Keeper** is the quick and easy way to collect, organize and share all your favorite recipes across your mobile, tablet, PC and Mac that includes a serving adjuster.
- **Recipe Scaler** - Recipe Scaler is your kitchen companion that instantly adjusts ingredient quantities for any serving size. Simply paste your favorite recipe and watch the magic happen!

1 How many mirrors can a traditional school bus have?

- a) 2
- b) 4
- c) up to 8
- d) 12

2 Approximately how many miles can a school bus travel in its lifetime?

- a) over 100,000 miles
- b) over 150,000 miles
- c) over 200,000 miles
- d) over 250,000 miles

3 About how long is a standard school bus?

- a) 10-15 feet
- b) 20-25 feet
- c) 35-40 feet
- d) 50-60 feet

4 What is the name of the flashing sign that swings out from the side of the bus?

- a) Warning Paddle
- b) Crossing Signal
- c) Stop Arm
- d) Safety Board

Did You Know?

- Modern school buses are among the safest vehicles on the road!

- A fully loaded school bus can weigh more than 20,000 pounds!

- A school bus's flashing red stop lights were first introduced nationally in the 1940s!

Trivia answer key: C, D, C, C
